

## MM3508C Series

2023/07/20

### Outline

MM3508C series is a double protection IC for 2-3 cell Li batteries.

It detects battery voltage for each cell. The terminal CT is used to control the output voltage of the terminal OV.

### Product Series

For 2 to 3 cells secondary protection

### Specifications

Product name	Package	Terminal CT	Overcharge detection voltage [V]	Overcharge hysteresis voltage $\frac{1}{4} \sim \frac{3}{4} V_{i14\%}$ [V]	Overcharge detection delay time [s]
MM3508C01RRE	SSON-6A	○	4.350	0.390	4.000
MM3508C01NRH	SOT-26A	○	4.350	0.390	4.000
MM3508C02RRE	SSON-6A	○	4.350	0.390	5.650
MM3508C02NRH	SOT-26A	○	4.350	0.390	5.650
MM3508C03RRE	SSON-6A	○	4.450	0.390	5.650
MM3508C03NRH	SOT-26A	○	4.450	0.390	5.650
MM3508C04RRE	SSON-6A	○	4.450	0.390	4.000
