## Overview

This IC is a 200mA Low dropout regulator IC with Rush current protection circuit. No load input current is 42 $\mu$ A typ. and it reduce drop voltage for high speed response. Rush current protection circuit can control rush current. The package is a small PLP-4C (1mm x 1mm), ideal for mobile devices.

## Application

- Audio visual equipment
- Portable communication device
- Photographing / Imaging device
- Wearable device

## Features

Fast transient response, Rush current prevention

## Main specifications

Output current [mA]	200
Absolute maximum rating [V]	6.5
Recommended operating voltage Min. [V]	1.70
Recommended operating voltage
