Specifications
Digital Indicator

CSD-904-EX
Spec. No.EN382904-EX-J

## 1. General

This instrument is the digital indicator suitable for the platform scale system.

## 2. Specifications

## 2-1.Specifications for analog

- Bridge power supply
- Applicable transducers
- Input sensitivity
- Input range
- Zero adjustment range
- Non-Linearity
- Temperature coefficient

Zero point
Sensitivity

- Input noise
- Input filter
- A/D sampling

2-2 Specification for digital

- Load display

Display range

Display increment
Display unit
Over display AD value over display

- Condision display
- Judgement display
- Display rate
- Decimal point display
- Unit display

DC5 $\mathrm{V} \pm 0.25 \mathrm{~V}$ within 120 mA with sensing funciton
Up to 8 pieces of strain gage applied transducers ( 350 ohm ) can be connectable.
$0.2 \mu \mathrm{~V} / \mathrm{d}$ or more ( $\mathrm{d}=$ minimum scale )
$-3.1 \mathrm{mV} / \mathrm{V}$ to $3.1 \mathrm{mV} / \mathrm{V}$
$\pm 2.5 \mathrm{mV} / \mathrm{V}$
0.01 \%F.S.
$\pm 0.2 \mu \mathrm{~V} /{ }^{\circ} \mathrm{C}$
(When the calibration is made at $0.2 \mu / \mathrm{d}$ or more of the input sensitivity.)
$\pm 0.0015 \%$ F.S. $/{ }^{\circ} \mathrm{C}$
(When the calibration is made at $0.2 \mu / \mathrm{d}$ or more of the input sensitivity.)
$\pm 0.4 \mu \mathrm{Vp}$-p or less
(At the default setting of digital filter and stabilization filter)
Approx. 1 Hz (At the default setting of digital filter and stabilization filter) 15 times/s
-999 999 to 999999
(Accumulation total display: -1999 999 to 9999 999,
Accumulation times: 0 to 999 999)
1 ( $2,5,10,20$ or 50 changeable)
7 -segment green colored fluorescent display tube with 22 mm character height
"-OL" display at minus over, "OL" display at plus over
"-OVF" display at minus over, "OVF" display at plus over
ACCUM., MD, PT, TARE, GROSS, NET, ZERO
HI, OK and LO (OK : Green colored fluorescent display tube, HI and LO : orange colored fluorescent display tube)
5 times/s ( 15 times/s changeable)
No display, $10^{1}, 10^{2}$ or $10^{3}$ changeable
g , kg , t or lb changeable (Green colored fluorescent display tube)

## Specificaitons

## 2-3.Function of front panel sheet key switch

ON/OFF
SET
ACCUM./
PRESET TARE/
TARE/ $\mathbf{A}$
NET/GROSS/ $\boldsymbol{\nabla}$
ZERO
PRINT/ $<$

Execute the light on(ON) or the light off(OFF) of display
Move to the accumulation display mode.
Execute the accumulation/carry up the setting value
Used in setting the fixed value of the tare weight cancellation /Carry down the set value
Execute or clear the tare weight cancellation/set value increment
Changeover the display for net weight or gross weight/Decrement of set value
Zero compensation of gross weight
Output the load data from the serial interface./Registration of set value

## 2-4.External control function

Seven in the followings can be selected optional.

- Operation of ON/OFF key
- Operation of SET key
- Operation of ACCUM. key
- Operation of PRESET TARE key for the tare weight cancellation
- Operation of TARE key for tare weight cancellation
- Operation of NET/GROSS key for changeover of the tare weight or the gross weight
- Operation of ZERO key
- Operation of PRINT key for printing
※Above is pulse input, and it is effective once at the pulse width of 100 ms or more.
- Display of the net weight
- Display of the accumulation value
※Above is level input, and it is effective during the input of short for 100 ms or more.
- Equivalent circuit of the external control input section

※An internal circuit and photocoupler are insulated.
※The common and serial interface are common.

## Specificaitons

## 2-5.Comparator function

Three patterns of "Upper/lower limit comparison mode", "Weigh-in mode" and "Weigh-out mode"

- Set value -999999 to 999999
(The range of weight in/out mode is 0 to 999 999.)
- Numbers of setting

2 points of LO and HI
(4 points of target value, fall, before full and near zero for weigh-in/weighout mode)

- Set value of hysteresis data width 0 to 99 digit
- Direction of hysteresis Changeable to "On delay" or "Off delay"
- Conversion times of comparator Changeable to 5 times/s or 15 times/s
(Synchronous with the display times.)
※The contact output for comparison result is made from the optional terminals at rear panel.

## 2-6.Serial interface

2-wires method serial interface
Baud rate 600 bps
Data bit length 8 bit
Parity bit Odd number
Stop bit 1 bit
Start bit 1 bit
Transmission data Binary code, BCD
※An internal circuit and photocoupler are insulated.
※The external control input and common are common.

## 2-7.Various function

- Zero tracking
- Digital filter
- Stabilized filter
- LOCK switch at real panel This switch lock the calibration function.
- Digital linearize Execute the compensation of the non-linearity by three points or less.
- Accumuration function The load data is accumulating added, and the frequency and total value are memorized.
- Fixed tare weight cancellation

Execute tare weight cancellation according to the set value input digitally.

## 3. General specifications

- Operating temperature/humidity range

Temperature Humidity
$-10{ }^{\circ} \mathrm{C}$ to $40{ }^{\circ} \mathrm{C}$
$85 \%$ RH or less (Non condensing.)

- Power supply

Power supply voltage AC 100 V (Permisible variable range AC85 V to AC110 V) Power supply frequency $50 / 60 \mathrm{~Hz}$
Power consumption Approx. 4 VA(without options, at AC100 V)
Approx. 10 VA(with options at AC100 V)

- Outline dimensions $192 \mathrm{~mm}(\mathrm{~W}) \times 96 \mathrm{~mm}(\mathrm{H}) \times 165 \mathrm{~mm}(\mathrm{D})$ (excludes protruding parts)
- Dustproof waterproof specification

During the panel mount is installed, the front panel section becomes IP 65 or equivalent.(When the attached panel mounting gasket is installed.)

- Weight

Approx. 1.6 kg (without options)

Stabilize the fluctuation of the zero point in a constant condition.
Data is stabilized through software in CPU.
The digital filter is reinforced and stabilized only when the width of the change of the load is constant. ion

## Minebea

## Specifications

## 4. Specifications at the time of shipment

- Bridge power supply
- Span adjustment
- The minimum scale

DC5 V
10000 display at the input of $0.5 \mathrm{mV} / \mathrm{V}$
1

## 5. Accessories

- Instruction manual
- Midget fuse (0.5 A)
- Plug for external control input
- Plug for connecting load cell
- AC power cable(for AC125 V)
- Earth adaptor
- Plug for BCD output
- Panel mounting attachment
- Panel mounting gasket

1 piece
1 piece
1 piece
1 piece
1 piece
1 piece
1 piece (Only when optional BCD output is installed.)
2 pieces
1 piece
6. Options

## 6-1.Current output

- Parts No. CSD904-P07
- Specifications

Output
Load resistance
Non-linearity
Over range
DC4 mA to 20 mA
510 ohm or less
$0.05 \%$ F.S.
Approx.DC2.4 mA at "-OL" display and approx.DC21.6 mA at "OL" display
※An internal circuit and photocoupler are insulated.

## 6-2.Voltage output

- Parts No.

CSD904-P25

- Specifications

Output
Load resistance
Non-linearity
Over range

DC0 V to 10 V
5 k -ohm or more
$0.05 \%$ F.S.
Approx.DC-1 V at "-OL" display and approx.DC11 V at "OL" display ※An internal circuit and photocoupler are insulated.

## Specificaitons

CSD-904-EX
Spec. No.EN382904-EX-J
5/11

## 6-3.BCD output

- Parts No.

CSD904-P15

- Specifications

Output BCD 7 digits, parallel output
with polarity(POL) applied (Output ON with minus, and output OFF with plus.),
P.C.(Print command) Turning on during fixed time after conversion of BCD output is completed
ERROR ON when the various error occurs.
OVER
STABLE
GROSS WEIGHT ON when the BCD output is gross weight
※Above are open collector outputs. $\mathrm{V}_{\mathrm{CE}}=\mathrm{DC} 30 \mathrm{~V}, \mathrm{I}_{\mathrm{c}}=\mathrm{DC} 20 \mathrm{~mA}$ at maximum
※The output is not updated, except for the measurement mode.
Input HOLD
Holding the BCD output
BCD-ENABLE Compulsorily turned off of the output related with BCD. (Hi-impedance)
※Above are level input, and effective during the input of short more than 100 ms .
Connector pin configuration of BCD output
Suitable plug : 57-30500

| 1 | $1 \times 10^{0}$ | 18 | $2 \times 10^{4}$ | 35 | N.C. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | $2 \times 10^{0}$ | 19 | $4 \times 10^{4}$ | 36 | N.C. |

| 11 | $4 \times 10^{2}$ | 28 | $4 \times 10^{5}$ | 45 | BCD-ENABLE |
| 12 | $8 \times 10^{2}$ | 29 | $8 \times 10^{5}$ | 46 | OVR. |
| 13 | $1 \times 10^{3}$ | 30 | $1 \times 10^{6}$ | 47 | P.C. |
| 14 | $2 \times 10^{3}$ | 31 | $2 \times 10^{6}$ | 48 | P.C. |
| 15 | $4 \times 10^{3}$ | 32 | $4 \times 10^{6}$ | 49 | HOLD |
| 16 | $8 \times 10^{3}$ | 33 | $8 \times 10^{6}$ | 50 | COM. |
| 17 | $1 \times 10^{4}$ | 34 | N.C. |  |  |

※Don't connect with N.C. pin.

- Equivalent circuit of input/output section.

※An internal circuit and photocoupler are insulated.
※The external control input and common are common.

## Minebea

## Specifications

- Timing chart
(1) Normal

※Output transistor will be ON (Negative logic in electrical theory) when all of the P.C., DATA and POL output the data.
(2) When data is over.

OVR
ON
$※$
Output transistor of OVR signal will become ON (Negative logic in electrical theory) during the output of OVR. Moreover, output transistor of all of the DATA will become OFF (Positive logic in electrical theory) during the output of OVR. POL will become OFF during plus over, and become ON during minus over
(3) When the error is occured.

DATA
POL.
P.C.

ON
ERROR
※Output transistor of ERROR signal will become ON (Negative logic in electrical theory) during the output of ERROR. Moreover, output transistor of all the P.C., DATA and POL will become OFF (Positive logic in electrical theory) during the output of ERROR.
(4) When the HOLD signal is input.

## Specifications

## 6-4.RS-232C interface

- Parts No.
- Specifications

CSD904-P74
Baud rate : Selectable from 1200, 2 400, 4800 or 9600 bps .
Data bit length
Parity bit
Stop bit
Terminator

Communication method : Half duplex
Synchronous method : Start-stop synchronous method
Communication data : ASCII code
Cable length : within 15 m

- Connector pin configuration of RS-232C Suitable plug : DE-9S-NR by JAE or equivalent.

| Pin No. | Signal name |
| :---: | :---: |
| 1 | CD |
| 2 | TXD |
| 3 | RXD |
| 4 | N.C. |
| 5 | S.G. |
| 6 | N.C. |
| 7 | RTS |
| 8 | CTS |
| 9 | N.C. |

※Connector plug is not attached.
※The engagement fixation stand screw is inch screw.
※Don't connect with N.C. pin.
※An internal circuit is insulated by photocoupler.
※The external control input and common are common.

- Function
(1)Reading out the load.
(2)Reading out the accumulated total value
(3Reading out the accumulated frequency value
(4)Reading out the condition
(Accumulation, Stable, Fixed tare weight cancellation, Gross weight,
Net weight, Zero, Unit)
(5)Changing the condition
(Zero set, Tare weight cancellation, Tare weight cancellation clear,
Accumulation, Accumulation clear, Gross weight display,
Net weightdisplay)
(6)Reading out the comparator set value
(7)Changing the comparator set value.
(8)Reading out the comparator judgement.
(9)Communication error code(error code as to the communication)

## Specifications

## 6-5.RS-422/485 interface

- Parts No.
- Specifications

CSD904-P76
Baud rate
Data bit length
Parity bit
Stop bit
Terminator
: Selectable from 1 200, 2 400, 4800 or 9600 bps.
: Selectable from 7 bit or 8 bit
: Selectable from None, Even or Odd.
: Selectable from 1 bit or 2 bit
: Selectable from CR+LF or CR
Communication method : Half duplex

Synchronous method
Address
Transmission data : ASCII code
Cabel length
Connectable unit
Termination
: Start-stop synchronous method
: Selectable one from 0 to 31
: Approx. 1 km
: 32 units at the maximum(RS-422 : 10 units)
: Internal
(Selects the presence by terminal block connection)
Input/output monitor with LED
Changeover the RS-422/485 : Set by function.

- Terminal configuration of RS-422/485

| Terminal Name | Signal name |
| :---: | :---: |
| SDA | Differential output(+) |
| SDB | Differential output( - ) |
| RDA | Differential input( + ) |
| RDB | Differential input( - ) |
| TRM | Termination |
| S.G. | Signal ground |

※An internal circuit is insulated by photocoupler.
※The external control input and common are common.

- Function
(1)Reading out the load.
(2Reading out the accumulated total value
(3)Reading out the accumulated frequency value
(4)Reading out the condition
(Accumulation, Stable, Fixed tare weight cancellation, Tare weight cancellation, Gross weight, Net weight, Zero, Unit)
(5)Changing the condition
(Zero set, Tare weight cancellation, Tare weight cancellation clear, Accumulation, Accumulation clear, Gross weight display, Net weight display)
(6)Reading out the comparator set value
(7)Changing the comparator set value.
(8)Reading out the comparator judgement.
(9)Communication error code(error code as to the communication)

## Minebea

## Specifications

CSD-904-EX
Spec. No.EN382904-EX-J
9/11

## 6-6.Contact type output

Contact type output of the judgement result of the comparator.

- P/No.
- Contact type output
- Specification of contact

CSD904-P43
3 points
1a contact
AC250 V 3 A (Registance load)
DC30 V 3A (Registance load)

- Equivalent circuit of the contact output section.

## 6-7.Power supply voltage

- P/No.

CSD904-P62 (AC120 V)
Power supply AC120 V (AC102 V to AC132 V) $50 / 60 \mathrm{~Hz}$ Power consumption Approx. 10 VA at maximum (with options)

- P/No.

CSD904-P63 (AC200 V)
Power supply AC200 V (AC170 V to AC220 V) $50 / 60 \mathrm{~Hz}$
Power consumption Approx. 10 VA at maximum (with options)
※Cable for 250 V power supply is not attached.

- P/No.

CSD904-P65 (AC240 V)
Power supply AC240 V (AC204 V to AC264 V) $50 / 60 \mathrm{~Hz}$
Power consumption Approx. 10 VA at maximum (with options) ※Cable for 250 V power supply is not attached.
※When this is used in Japan domestic, the voltage that exceeds AC125 V cannot be supplied by the limitation of "Electrical Appliance and Material Safety Law".

## 6-8.Combination of optional products

|  | P07 | P25 | P15 | P74 | P76 | P43 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| P07 | - | $\times$ | $\times$ | $\times$ | $\times$ | $\bigcirc$ |
| P25 | $\times$ | - | $\times$ | $\times$ | $\times$ | $\bigcirc$ |
| P15 | $\times$ | $\times$ | - | $\times$ | $\times$ | $\bigcirc$ |
| P74 | $\times$ | $\times$ | $\times$ | - | $\times$ | $\bigcirc$ |
| P76 | $\times$ | $\times$ | $\times$ | $\times$ | - | $\bigcirc$ |
| P43 | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | - |

P07 : Current output( 4 mA to 20 mA )
P25 : Voltage output(DC0 V to 10 V)
P15 : BCD output
P74 : RS-232C interface
P76 : RS-422/485 interface
P43 : Contact type output

## Minebea

## Specifications

CSD-904-EX
Spec. No.EN382904-EX-J

## 7. Outline dimensions

Side shape when AC cable, input plug for external control or plug for connecting load cell are applied.

Side shape when BCD plug is applied

Unit:mm

## Specifications

CSD-904-EX
Spec. No.EN382904-EX-J

## 8. Conformity standard

- The instrument has suited the following standard.

Annex C (Performance test level H ) of JIS B 7611-2 : 2015
"Non-automatic weighing instruments -
Metrological and technical requirements and tests -
Part 2:Measuring instruments used in transaction or certification"

It conforms to the above standard from the production in May,2010.
( The logo print of its front panel appears as "Minebea" not as "NMB".)

The using condition to suit this standard is as follows.
(1) Shield processing

Use the shielded cable for all connections expect a power supply cable.
The shield of the cable for current output, voltage output, RS-422/485 interface and contact output shall be connected with the F.G. terminal.
After using the connector with a metallic shell, in the connection with BCD output and RS-232C interface, the shield must come in contact directly with a metallic shell of the connector.
(2) Setting Functions

As for the details of the function of the value of C Function and Function, please refer the paragraph 5-2 and 7-2.

CF-03 "Condition of over display" shall be applied with the value of 2 .
CF-11 "Effective range of zero set" shall be applied with the value of 0 .
CF-13 "Data width of zero tracking" shall be applied with less than $4 \%$ of maximum weighing capacity.
F-01 "Digital filter setting" shall be applied with more than the value of 3.
F-05 "Stabilized filter setting" shall be applied with more than the value of 4 .
F-06 "Stabilized filter data width" shall be applied with less than the set value of 005.
F-07 "Stabilized filter time width" shall be applied with the set value of more than 01.
F-10 "Detection of stability data range" shall be applied with less than the set value of 4 .
F-11 "Detection of stability time range" shall be applied with more than the set value of 2 .
※Specifications and Outline dimensions and so on which have printed may subject to change for the purpose of improvement without notice.
