1. Forward

The manual is the Install Manual. We explain installation procedures of TgAnest to PC. Please read the Instruction manual with care, and install the software properly according to the contents of the manual.

2. Permission

- The contents of the Reference Manual may subject to change due to improvement without notice.
- We expended all possible means to the contents of this Reference Manual during creating it, but there may have the case that we can't correct the contents at once, even if some errors and erroneous omit might be found.
- The author's Copyright of this Install Manual owns MinebeaMitsumi Inc.
 This publication may not be reproduced (reprint/copy) in whole or in part without written permission from MinebeaMitsumi.

3. Scope of Permission of software

This software implies the targeted software (TgAnest software, attached data) and library (documents of Instruction manuals and so on).

- The software is used only for each specified Testing Machine.
- When handing over all the rights of the software, you couldn't possess its copies.
 In this case, make it a condition that you should hand over all of the software (All of the components, media, and documents) and at the same time the conveyor should agree with the articles of Scope of Permission of software.
- If the software is version up type of software, handing over means that all of the software includes with the former versions.
- It's prohibited that handing over whole the software or in part, lease, reprint (copy), remodeling, correction, reverse engineering, reverse compile and disassemble.
 Of course, you couldn't make a third party to do such things shown in above.

4. Targeted instruments for operation

Personal Computer	
Operating system	Windows® 10, Windows® 11
CPU	Intel® Pentium® (Dual Core or Single Core) processor, clock speed 2 GHz or higher
Minimum working memory	Windows® 10 : 2 GB or more Windows® 11 : 8 GB or more
Hard disk	At least 1 GB of free space
CD-ROM drive	or DVD drive
Free USB ports	1 required for communication using USB cable with the TGE, TGI, or TG testing machine Required when using the TGJ testing machine If the communication cable connected to the testing machine is an RS-232C cable, the following USB adapter is required. USB Converter : I-O Data USB-RSAQ*R
Free PCI slots	Up to two (Not required unless an LEE displacement transducer is used or external input functions are used.) Counter board (when an LEE displacement transducer is used): Contec CNT-3208M-PE (PCI Express) Analog input board (when external input functions are used): Contec AIO-160802L-LPE (PCI Express)
Minimum resolution	1,280 x 768 or higher
.NET Framework	4.6.2 or higher

* This software doesn't guarantee the operation with all PC.

*When using this software, set the Windows display language setting to "English (United States)".

7. Install of USB driver

To communicate with the testing machine through USB port, the PC needs to be equiped with USB driver.

Here, we will explain the installation procedures and confirm procedures after installation.

For Windows 10

* In the case of Windows 11, the screen display is different, but the procedure is the same.

1. Install

Insert the setup disk to the CD-ROM.

During the testing machine power is off, connect PC to testing machine with a USB cable and turn on the testing machine.

Right click [Start] and choose the [Device Manager].

Then we will enter the [Device Manager] window, find [USB <-> Serial] under the catalogue of [Other device], right click it and choose [Update Driver Software...].

<
]

At last, take the setup disk out and the install is over.

2. Communication confirm after the USB driver installation

This part will introduce a method with which we can confirm whether the USB driver is installed right or not.

Take the install steps as reference and enter the [device manager] window.

If [USB Serial Port(COM*)] is showed below [Port(COM and LPT)], then the USB driver is installed right.

Attention : * is port number and its value depends on system and time.

8. In troubleshooting !?

During in stallion, if you are in trouble, such an unexpected operation is occurred, please check the following contents. Even if you can't make it recovered after checking it again by following the below contents, please contact MinebeaMitsumi's business office or agency.
